From shipment to temperature record

One logger travels with the shipment. A quick upload at destination makes its temperature history available to view.

Four steps, one complete record.

Follow the logger from dispatch through to the uploaded temperature history.

01 Record

Start the logger and place it with the shipment.
It records temperature during storage and transport.

02 Scan

At destination, scan the QR code.
Open or install the Silenttrac uploader from the link.

03 Upload

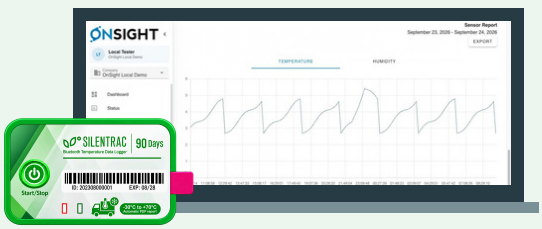

Connect to the logger by Bluetooth and tap Upload.
No login required. An internet connection is needed to send the record.

04 View

The temperature record is uploaded automatically.
It is available in OnSight for reporting and sharing.

Temperature history, ready to use.

View the uploaded record in OnSight.
